

Whole Pathology Digital Pre-Analytics Transparency, Traceability & Flexibility

A digital profile would enable Pathology to collect data to satisfy ISO 15189 audits regarding pre-analytical information, while also reducing errors (over 60% of Pathology errors occurs in the pre-analytical phase) by standardising sample collection technique and providing in depth data which can be used to better interpret anomalous clinical results.

Presented by Sarstedt
On Wednesday 18th January 12-1pm
